

BSP/BHP – Sanitation Materials

Use this form to list all cleaning and sanitation products to be used in your Biodynamic® operation, including but not limited to materials used for cleaning equipment, storage containers, harvest containers, livestock milking equipment, and materials that otherwise have direct contact with organic product. It is your responsibility to ensure materials are approved for use by Demeter prior to use. Demeter accepts OMRI and WSDA reviews; however, some materials allowed for NOP organic are not allowed for Demeter. For materials not appearing on either of these lists, a separate review must be conducted by Demeter. Include a Request for Material Input Review for each material not listed on OMRI or WSDA.

This form must be updated whenever new materials are added to your Biodynamic system plan.

For each input listed please provide the following:

- 1. A picture of the exact product.**
- 2. Current OMRI Certificate or other organic verification documentation, if available.**

Complete Product Name	Manufacturer	Ingredients	Reason for Use	3rd Party Verification	Approval Office use only
<i>EXAMPLE: Kumulus DF</i>	<i>Ex. Wilbur- Ellis Co</i>	<i>ex: Sulfur- elemental</i>	<i>ex: mildew prevention ex:</i>	<i>OMRI w/restrictions</i>	<i>ex: AB Jan2019</i>
