Crop Plan / Rotation

Field ID & acreage listed must be consistent with the field ID & acreage illustrated on your map. Biodiversity acreage must be clearly defined.

Field I.D.	Number of Acres	2018 Crop	2019 Crop	2020 Crop	Estimated 2020 yields	Food or Feed
BIODIVERSITY ACREAGE						
TOTAL ACREAGE						

Demeter operations:

1. List approximate weight and type of fertility material produced on your farm in 2019. Indicate whether weight is on raw or composted basis. Are you planning changes for 2020? On average, how much compost is applied and how often?

2. List approximate weight and type of fertility material derived from other sources in 2019. Indicate the source and whether materials are estimated raw or composted? Are you planning changes for 2020?
